Pathway			
	app >	Folder having the model(Business) and controller code.	
	bootstrap >	Laravel CSS files no need to change	
	config >	all configuration database, mails, session, cookies	
	database >	database migration files to connect to database performing CRUD operations using php	
5	public >	all unix jobs scripts,R script, images,CSS amd JS files	
6	resources >	all view oriented PHP files	
7	storage >	Laravel oriented files no need to change	
8	tests >	Test code can be written here	
g	vendor >	Laravel framework file	
	.env	environment configuration files	
	.gitignore	git configuration which files should not be included on bit bucket	
	artisan	Laravel framework access main file	
	composer.json	Laravel composer dependecy management file	
	dump.sql	database dump	
	package.json	Laravel to add library to the project we are not using any library	
	readme.md	Bit bucket readme file	
	server.php	laravel server code to start a server and configure	
Dethurs and			
Pathway> app			
	Commands >		
	Console > Exception >		
	Handlers >		
	Http >	Controllers files	
	Providers >	Laravel based code	
	Services >	Laravel Service files (Registrar.php)	
	analysis.php	Model linked to database table analysis	
	analysis_errors.php	Model linked to database table analysis_errors	
	biocstatistics.php	Model linked to database table biocstatistics	
	compound.php	Model linked to database table compound	
	gene.php	Model linked to database table gene	
	Pathway.php	Model linked to database table Pathway	
	Species.php	Model linked to database table Species	
	speciesPathwayMatch.php	Model linked to database table speciesPathwayMatch	
	User.php	Model linked to database table user	
Pathway>app>Http			
1	Controllers >	All Controllers	
2	Middleware >		
3	Requests >	Default Validation code files	
	Kernel.php		
	routes.php	Linking all the requesting URL and corresponding PHP linking	
Pathway>app>Http>Controllers	A. ab. v	 	
1	Auth >		
	Controller.php WelcomeController.php	Welcome page controller	
	Parser.php	Parser used for Rserve code	
	ProfileController.php	Controller for Profile of the user	
	config.php	Config used for Rserve code host and port Rserve should be installed	
	GuestController.php	Guest related Controller	
	PreviousAnalysis.php	Analysis History Controller	
	Rserv_Connection.php	Rserve Controlleer	
	HomeController.php	Home page of the user controller	
		Ajax request for Species Pathway match	
	AnalysisController.php	Main code for the analysis of all 3 and new analysis creating arguments list and running the Rscript code	
Pathway>app>Http>Controllers>Aut	h		
Tank app Title Controllers Aut	AuthController.php	Authorisation code	
	PasswordController.php	Password managementcode	
	PasswordEditController.php	Password edit code from user profile	
Pathway>config			
	view.php	View file actual HTML files location where the view php files exist	

	queue.php		
	database.php	database configuration	
	auth.php	authorisation	
	services.php		
	compile.php		
	and a star		
	cache.php		
	filesystems.php		
	app.php		
	session.php		
	mail.php	mail configuration	
	ар.тр	That congressor	
Pathway>resources			
	assets >		
	langs >	+	
	Views >	View files php code where the html code is available	
Pathway>resources>views			
	admin >	admin pages not included in the project yet	
		earning pages not morated at the project yet	
	2 vendor >		
	errors >	view shown on errors specific to error code and defualt error	
	auth >	authintication related view login,registration,password change,password reset etc	
	analysis >	analysis view, new analysis, example analysis pages	
	profile >	user profile related views	
	7 guest >	guest related views	
	B emails >	email view sent to users on successfull analysis and reset password emails	
-			
	footer.blade.php	Footer for each view of the project	
	navigation.blade.php	Left Navigation bar for the 4 analysis pages	
	welcome.blade.php	Welcome page of the project	
	about.blade.php	About Page of the project	
	tutorial.blade.php	Help Document page of the projec	
	analysis.blade.php	Analysis page template for all the three example analysis and new analysis	
	app.blade.php	Generic template used by all pages	
Pathway>resources>views>errors			
•	customError.blade.php	custom error page	
	503.blade.php	service not available error page	
	404.blade.php	Server could not find the file or requested file	
	403.blade.php	Authorisation error whenver this error occurs user is trying to cross user permission and show error with login	
Pathway>resources>views>auth			
Tutiliaj Toodurooo Tidilo uutil		The state of the s	
	reset.blade.php	page to reset the password	
	login.blade.php	page for the login	
	password.blade.php		
		page for password reset	
	register.blade.php	page for password reset register page	
	register.blade.php	register page	
	register.blade.php	register page	
	register.blade.php password_edit.blade.php	register page

	1		
	user.blade.php	user profile page	
	user_edit.blade.php	user profile edit page	
	anal_hist.blade.php	user analysis history page	
	home.blade.php	register user default page	
Pathway>public			
	Kegg >	kegg images downloaded by KeggDownload.sh script every month and place file into this folder	
	js >	javascript files for the project	
	css >	css file for the project	
	images >	images used in the project	
	data >	data file used by scripts	
	scripts >	file maintainence and data import script	
	all >	all the user and guest generated files	
	fonts >	fonts used for the project	
	index.php	index.php required by any web server	
	readme.txt	about the project	
	Script_Rserv.R	Rserve Rscript code used for the analysis generatio	
	my_Rscript.R	Rscript code used to generate analysis	
	dump.sql	sql dump of the data minimum data needed to run the project	
Pathway>public>js			
	analysis.js	example analysis javascript code containing validation and ajax request for the data	
	bootstrap-colorpicker.js	color pickert framework	
	bootstrap.js	bootstrap javascript code used in slider animation	
	ChartNew.js	js used for graph at welcome and about page	
	docs.js	used in color picker	
	newanalysis.js	new anlysis validation and ajax requests	
	sliding.form.js	analysis form slider js	
	usageStatistics.js	statistics graph js but not used for backup	
Pathway>public>css			
, panie coc	app.css	slider css for the form	
	bootstrap1.css	bootstrap framework css changed for pathview project	
	carousel.css	carousel css for the slider	
	custom.css	slider css for the form	
	dashboard.css	slider css for the form	
	docs.css	slider css for the form	
	style.css	manual css wrote specific to project	
		, , , , , , , , , , , , , , , , , , , ,	
Pathway>public>scripts			
- allinaje publice compto	biocStatsimport.sh	bioc statics import runs every day at 2:30 AM	
	· · · · · · · · · · · · · · · · · · ·	every day erros mailed to the list of email specified in the script	
	EveryDayErrorsLogMail.sh FileMaintain.sh	file maintainence whenever file quota is exceeded the limit old analysis are deleted and guest files are deleted every day runs every 5 hou	re
			u e e e e e e e e e e e e e e e e e e e
-	KeggDownload.sh	Kegg images download runs kegg,r internally Kegg image download R code running the R code	
	kegg.r	regg image download it code running the it code
